Project Cost Estimate/Bid:	\$5,000,000	as of	3/31/22			
SOCIOECONOMIC FACTO	ORS					

The table below pulls certain data from the American Community Survey, Decennial Census, and Centers for Disease Control to reveal the underlying and aggregate socioeconomic condition of the utility service area. Please enter or select the communities below that make up the Total Service Area and enter the corresponding percentage of the total population served within each. It is important to get as close to 100% as possible. Please refer to the Intended Use Plan further details; documentation is also available at IowaSRF.com.

UTILITY SYSTEM INFORMA	TION AND AV	/ERAGE COST:	S					

This section estimates the cost to operate and maintain the utility system annually on a per customer basis. Costs are further represented as a percentage of the service area's MHI, calculated in the section above. Affordability points are allocated if this ratio exceeds 1.0%, with maximum points (2) allocated for ratios exceeding 1.25%.

Average Annual System Costs		Result	Points
Avgerage Annual Operations and Maintenance (water or sewer)): \$40,000	< 1.0%	0
Existing Annual Debt Service (average or most recent year):	\$25,000	1.00-1.50%	2

Notes on Scoring:								
		1	1		I	1		

Points are earned for each category above based on how the community/service area compares to the state of Iowa as a whole. No points are earned if the resulting data is equal to or better than the state's result. One r is between 1.0x and 1.1x the statewide result (up to 10% worse). Two points are given if the service area metric is between 1.1x and 1.2x the statewide result (10-20% worse). Three points are earned if the service area metric is between 1.1x and 1.2x the statewide result (10-20% worse). Three points are earned if the service area metric is between 1.1x and 1.2x the statewide result (10-20% worse).

However, two categories above are scored differently: Population Growth Between the 2010 and 2020 Census and Social Vulterability Index.

Population Growth Trend:		Social Vulterabilit	ty Index:					
0: Positive Growth		0: 4th Quartile						
1: No Growth (0%) to -10%		1: 3rd Quartile						
2: -10% to -20%		2: 2nd Quartile						
3: More than -20%		3: 1st Quartile (highest SVI)

Instructions

Enter or select each community that makes up the utility's service area in the blue boxes below, along with the corresponding percent of population served (must equal 100%). A weighted average for each metric will be calculated and assigned points.

Example, a utility serving three communities with a combined population of 50,000 may look like this:

	City A	City B	City C	Total	ו			
Population Served	25,000	15,000	10,000	50,000	1			
Weighted Percent	50.00%	30.00%	20.00%	100.00%				
Percent of Population Served:	100.00%					100.00%
