ACTION**REPORT****IOWA ECONOMIC DEVELOPMENT AUTHORITY BOARD
JANUARY 2025**

From: Compliance

Subject: Contract Status Report – 180 Day Signing Deadline

180-Day Contract Signing Rule

The administrative rules adopted by the Board require that recipients execute a contract with the Authority within 180 days of the award date. Below is an excerpt from the applicable rule:

“Successful applicants will be required to execute an agreement with the authority within 180 days of the award date. The time limit for execution may be extended by the authority director for an additional 180 days for good cause shown. Upon expiration of the time limit, including any extensions approved pursuant to this subrule, the board may approve additional extensions or rescind the award.”

Awards Requiring Action this Month

Listed below is the 1 award for requiring action.

Business Finance Awards:**Recission:**

- **New Horizon Cuisine** – This is a September 2025 award. The company wishes to decline the award.
Recommendation: Rescind

Proposed Motion:

DDC: Recommend that the IEDA Board approve the recommendation set out above regarding the 180 day signing deadline for the 1 pending contract.

Board: Accept the recommendation by the Due Diligence Committee to the Board regarding the 180 day signing deadline for the 1 pending contract as described above

Benton Quade
Iowa Economic Development Authority
200 East Grand Ave
Des Moines, Iowa 50309

Mr. Quade and IEDA Board of Directors,

Please accept this letter as a formal request for a 24-month extension for project 23-HQJP-005 from 10/31/2025 to 10/31/2027. As of 11/30/2025, the total headcount for Cambrex Charles City is 410, which is 43 positions less than the project commitment of 453. We experienced headcount challenges in 2024 due to economic conditions impacting the pharmaceutical industry. However, over the last year we have shown steady headcount growth with a total increase of 45 positions in 2025. We anticipate this positive trend will continue over the next two years, enabling us to meet project commitments within the requested extension period.

Project spend as of 10/31/2025 totals \$6.9M, which exceeds the project budget of \$6.5M

Thank you for considering this request for extension for Cambrex Charles City, Inc.

Best Regards,

A handwritten signature in blue ink that reads "Jaclyn Van Horn".

To: Board of the Iowa Economic Development Authority
Date: December 12, 2025
From: Convergen Energy
Subject: Extension of Convergen Energy Fairfax, Iowa Project (Contract 23-HQJP-008)

Dear Iowa Economic Development Authority Board:

Convergen Energy respectfully would like to request an extension of our project. To-date we have engaged with engineering, design, construction and development, and the local utility in advancing our project. We have developed site plans, ascertained local utility connection points and the necessary service. In total between \$150,000 and \$200,000 has been spent on this work.

We are currently, however, in the middle of on-going negotiations with our anchor customer for a long-term contract which will form the basis for the project. These negotiations have lasted longer than expected for a variety of reasons but we are making very good progress.

As a result, we would like to request an extension of twenty-four (24) months. This will allow us to complete our negotiations and construct the project, as well as to complete the corresponding hiring. We have not hired any direct employees at this time but once the contract with our anchor customer is in place we intend to begin hiring for a number of key positions.

I am happy to discuss further as well as to answer any questions you may have.

Best Regards,

A handwritten signature in black ink, appearing to read 'Steven J. Brooks'.

Subject: Nebullam, LLC – Request to Amend Payment Terms

Business:	Nebullam, LLC
Project Location:	Ames
Award Number:	19-DEMO-003
Award Date:	September 21, 2018
Award Amount:	\$100,000 royalty (A royalty equal to 3% of prior-year total Gross Revenues will be due to IEDA on a semi-annual basis until \$133,000 is repaid.) Funds disbursed November 2018.

The Company requests to continue to defer payments through December of 2026. If forbearance isn't viable, alternatively the company proposes to make a \$10,000 payment by December 31, 2026.

One prior 12-month deferral of payments was approved in November 2024.

TCC Recommendation: Amortize \$10,000 over 6 monthly payments, beginning April 1, 2026. Regular royalty payments to resume in 2027.

Proposed Motion: Approve TCC Recommendation

Des Moines, Iowa 50315

RE: Request for loan forbearance

Hello Katie Rockey,

I am writing to formally request a loan forbearance for our outstanding balance of the loan issued through the Demonstration Fund program (loan number 19-DEMO-003). The company has a track record of fulfilling its debt obligations, including fully paying off its loan through the IEDA's Proof of Commercial Relevance program, business loans, and credit card balances.

To date, we have paid approximately 16% of the Demonstration Fund loan.

Current Environment and Challenges

Throughout 2025, we have faced several economic and operational challenges that continue to strain our cash flow position. Input costs and operating costs have continued to rise despite our efforts to lower our burn rate to historical lows. Some examples of significant cost-cutting measures we have taken include eliminating non-essential positions (reduced personnel costs by 40% over the past year), subleasing underutilized space (reducing facility costs by over 60%), negotiating payment terms with vendors, and maintaining minimal inventory levels. Despite these cost-cutting measures, we project that our current capital will only last through June 2026, unless additional financing is secured and/or current debt payments are temporarily postponed.

Nebullam, Inc.

2500 North Loop Drive, Suite 7550

Ames, IA 50010

During 2024 and 2025, many founders faced tough fundraising conditions, as VC firms demanded more favorable terms, including lower valuations, higher equity stakes, and stronger rights in future rounds.

Early-stage companies, including Nebullam, faced tough terms, and many chose to delay fundraising in hopes of better conditions in the future.

As an early-stage technology startup, we continue to find it a challenge to generate any interest in traditional debt financing, specifically a term or operating note from a bank. Most banks are not interested in lending to companies that are not profitable and/or have an above average debt to asset ratio, both common for early stage companies.

Opportunities and Strategies

While 2024 and 2025 proved to be a challenging year for fundraising, we are optimistic about our longer-term prospects. Early market signals are showing a more favorable environment for fundraising early in 2026, which aligns with our plans to initiate an equity round of financing, to be completed by end of Q2.

As we enter 2026, we have shifted focus to expansion within San Francisco, California. We believe the San Francisco expansion will not only allow the company the most upside from revenue and profitability priorities, but also additional financing toward our 2026 fundraising goals.

In short, we are facing short-term financial challenges as we continue to focus investing our limited financial resources toward a business with sustainable profitability and positive cash flow.

Request for Forbearance

Given the above circumstances, we respectfully request forbearance on our outstanding loan through December of 2026. This temporary relief will enable us to focus on executing our plan to secure the necessary capital to ensure long-term growth and sustainability.

As an alternative to full forbearance through December 2026, we believe that a successful fundraise by June 2026 would allow us to make a payment of \$10,000 toward our remaining Demonstration fund loan balance, by December 31, 2026.

Nebullam, Inc.

2500 North Loop Drive, Suite 7550

Ames, IA 50010

During this forbearance period, we will continue to keep you informed of our progress, including updates on fundraising efforts, the expansion of our partner locations, and improvements in our financial performance.

Per your request, attached are Nebullam's current balance sheet and profit and loss statements as of Sep 30, 2025.

We appreciate your consideration of this request. Thank you for your understanding and continued partnership.

Clayton Mooney

Chief Executive Officer

Nebullam, Inc.

REPORT
IOWA ECONOMIC DEVELOPMENT AUTHORITY BOARD
JANUARY 2026**ACTION**

From: Innovation Team

Subject: Technology Commercialization Committee (TCC) Recommendations

Critical Materials Recycling, Inc.: \$100,000 Demonstration Fund - Approve

Proposed Motion: **Accept the recommendation of the TCC to approve a \$100,000 Demonstration Fund loan with standard Demonstration Fund loan terms: 3% rate of interest, a 5-year loan term and a 6-month deferral.**

Koos Medical Innovations, Inc.: \$100,000 Demonstration Fund - Approve

Proposed Motion: **Accept the recommendation of the TCC to approve a \$100,000 Demonstration Fund loan with standard Demonstration Fund loan terms: 3% rate of interest, a 5-year loan term and a 6-month deferral.**

Hermes Biomaterials, Inc.: \$50,000 Proof of Commercial Relevance - Approve

Proposed Motion: **Accept the recommendation of the TCC to approve a \$50,000 Proof of Commercial Relevance loan with standard POCR loan terms: 0% rate of interest, a 5-year loan term and a 6-month deferral.**

Broker Hero, LLC.: \$50,000 Proof of Commercial Relevance - Approve

Proposed Motion: **Accept the recommendation of the TCC to approve a Proof of Commercial Relevance award of \$50,000 in financial assistance with repayment terms as follows: repayment amount is 1 times the award amount paid back at a rate of 3% of total gross revenue per calendar year, which does not include grant funds, with each payment due on June 1 of the following calendar year.**

Morrigan Company: \$50,000 Proof of Commercial Relevance - Approve

Proposed Motion: **Accept the recommendation of the TCC to approve a Proof of Commercial Relevance award of \$50,000 in financial assistance with repayment terms as follows: repayment amount is 1 times the award amount paid back at a rate of 3% of total gross revenue per calendar year, which does not include grant funds, with each payment due on June 1 of the following calendar year.**

Renewabl Furniture, Inc.: \$50,000 Proof of Commercial Relevance - Approve

Proposed Motion: **Accept the recommendation of the TCC to approve a Proof of Commercial Relevance award of \$50,000 in financial assistance with repayment terms as follows: repayment amount is 1 times the award amount paid back at a rate of 3% of total gross revenue per calendar year, which does not include grant funds, with each payment due on June 1 of the following calendar year.**

IEDA Project Report – Demonstration Fund

Applicant Name: Critical Materials Recycling, Inc. (\$100,000)

Project Location: Boone, IA

Award Date: January 16, 2026

Company Background

Critical Materials Recycling, Inc. (CMR) is an innovative cleantech startup headquartered in Boone, Iowa, specializing in sustainable recycling of Rare Earth Elements (REEs) essential for defense applications, clean energy and advanced technologies. Founded in 2021 as a technology spinoff from TdVib LLC, CMR builds on a rich history of REE expertise dating back to 1987 through TdVib's acquisition of Etrema Products, Inc., which commercialized rare-earth-based smart materials from the U.S. Department of Energy's Ames National Laboratory.

CMR's core product is high-purity Rare Earth Oxides (REOs), recovered through their patented Acid-Free Dissolution Recycling (ADR) process. Unlike traditional acid-based methods, ADR uses environmentally benign solvents to selectively extract REEs such as Neodymium (Nd), Praseodymium (Pr), and Dysprosium (Dy) from diverse waste streams, including shredded hard disk drives (HDDs), wind turbine magnets, electric vehicle (EV) motors, manufacturing swarf, and consumer electronics. This produces mixed REOs at 99.5%+ purity, which are sold to downstream processors for conversion into high-performance magnets. Byproducts like copper are recovered for reuse, enhancing circularity.

CMR's services focus on providing a domestic, secure alternative to foreign REE mining, addressing supply chain vulnerabilities dominated by China (70% mining, 90% processing). TEA/LCA work performed highlights a >70% decrease in CO2 emissions compared to mining operations. Markets include clean energy, consumer electronics, aerospace, and Department of Defense (DoD) applications, where REEs enable efficient motors and generators. Customers range from tech giants to magnet manufacturers.

CMR's Iowa roots leverage the state's #2 ranking in wind energy (behind Texas), positioning them to capture end-of-life turbine waste locally. With a team led by CEO Daniel Bina (10+ years in REEs) and CTO Kevin Stoll (chemical engineering veteran), they are scaling from pilot to 100 metric tons REO annually by 2026, targeting 1,000 MT by 2029. This aligns with global REE demand tripling by 2030, driven by electrification, while reducing environmental impacts from mining. CMR's mission: Foster a sustainable materials economy, reducing U.S. reliance on imports and electronic waste.

Project Description

Demonstration Funding will cover hiring a Chief Commercial Officer and branding updates. The Chief Commercial Officer (CCO) will focus on managing CMR's growing client relationships (both upstream and downstream) and develop commercial agreements. The CCO will join fractionally initially and transition to full-time after CMR's next capital raise, focusing on strategic outreach to secure binding deals and enhance market visibility. Key areas include building on their existing collaboration with the Iowa Automotive Recycling Association to develop a robust network for hybrid/electric vehicle recycling, finalizing agreements with GRI on wind turbine recycling, expanding the Western Digital ecosystem to include more hyperscalers, and collaborating with universities for HDD recycling efforts. These initiatives target Iowa's strengths, such as its #2 ranking in wind energy and growing EV infrastructure, potentially diverting thousands of tons of waste annually while generating \$2-5 million in early revenue through secured offtakes.

The project also includes a marketing and branding refresh and collateral development, so that CMR can have a fresh and professional image to take into their next phase of development and indicate the level of professionalism they bring to their key stakeholder relationships. As the REE industry is in its infancy in the US, effective marketing will play a key role in drawing national attention to CMR and positioning Iowa as a primary player in domestic REE recycling nationwide, highlighting their sustainable ADR technology and attracting federal grants, investors, and partners.

The problem this solves is CMR's limited bandwidth to capitalize on surging REE demand amid supply chain vulnerabilities. As a pre-Series A startup with a pilot plant, CMR faces challenges in scaling relationships with target clients—suppliers and buyers. Current MOUs need conversion to revenue-generating agreements, but their lean team lacks dedicated commercial expertise. Outdated branding hinders investor and partner appeal.

Contract Conditions:

Contract Information:

Date of TCC Action: January 8, 2026

Project Award Date (date of IEDA Board decision): January 16, 2026

Project Performance Completion Date:

IEDA Project Report – Demonstration Fund

Applicant Name: Koos Medical Innovations, Inc. (\$100,000)

Project Location: Ankeny, IA

Award Date: January 16, 2026

Company Background

Koos Medical Innovations (KMI) is a woman-owned small business founded by physician and entrepreneur Dr. Maggie Koos. KMI was established to address critical gaps in infection prevention and patient safety. Dr. Koos identified an urgent need for higher-performance isolation gowns capable of meeting clinical demands. This insight led to the development of KMI's innovative, patented disposable isolation gown—designed to reduce exposure risk for both patients and providers.

Healthcare-associated infections (HAIs) represent one of the most persistent challenges in healthcare, resulting in significant morbidity, mortality, and financial burden for hospitals nationwide. Despite the clinical importance of personal protective equipment (PPE), many isolation gowns currently used in U.S. hospitals fail to meet FDA performance specifications. This gap leaves healthcare workers vulnerable to fluid exposure and increases the likelihood of infection transmission within clinical environments. The ongoing use of substandard disposable gowns reflects supply chain pressures, limited regulatory oversight, and a lack of manufacturer accountability.

KMI's flagship product is the only disposable isolation gown engineered to meet FDA specifications, providing a superior barrier when compared to traditional gowns currently utilized in hospitals. This product was launched in June 2025, initially marketing to large hospital systems, infectious disease task forces, and supply chain leadership. KMI is currently planning hospital-based studies to clinically demonstrate superior protection against infectious germ contamination and enhanced compliance, enabling health systems to achieve meaningful reductions in both risk and cost associated with HAIs.

Once the study demonstrates the consequences when gowns fail to provide adequate protection, KMI aims to petition the FDA to reclassify isolation gowns from Class I to Class II medical devices, requiring improved validation through 510(k) submissions. This regulatory change would help ensure safer manufacturing practices, encourage innovation, and reduce the spread of preventable infections. As KMI's gown is already designed to meet these higher standards, the company is well positioned for leadership in this evolving market.

Beyond disposable isolation gowns, KMI's broader mission is to develop sustainable advancements in medical PPE and healthcare technology. The company plans to expand into biodegradable disposable products, addressing rising environmental concerns in the healthcare sector. By combining clinical insight, innovative design, and strategic industry collaboration, Koos Medical Innovations is committed to improving patient safety, reducing infection-related costs, and advancing the standard of protective equipment across healthcare systems.

Project Description

Koos Medical Innovations (KMI) is requesting Demonstration Fund to commercialize its patented disposable isolation gown. The project will bridge KMI's pre-seed development stage to seed investment readiness by supporting critical marketing, business development, and validation activities tied to early market entry.

KMI's solution is a high-performance disposable isolation gown engineered to meet the appropriate FDA standards and provide superior protection. By aligning product design with recognized clinical performance requirements, KMI directly addresses the systemic risk posed by

IEDA Project Report – Demonstration Fund

Applicant Name: Koos Medical Innovations, Inc. (\$100,000)

Project Location: Ankeny, IA

Award Date: January 16, 2026

inadequate PPE and positions healthcare systems to make meaningful reductions in preventable infections. The company intends to launch regionally, expand nationally, and ultimately scale internationally through strategic distributor partnerships.

Demonstration Fund support will allow KMI to complete key commercialization tasks required to generate early customer traction and support follow-on private sector funding. These activities include the development of marketing and distribution strategies, creation of professional marketing materials targeting infectious disease task forces, nursing leadership, and supply chain decision-makers. Additionally, KMI will use funds to participate in targeted infection control, nursing, and healthcare supply chain conferences to increase visibility, gather market feedback, and build relationships with early adopters. These efforts will help validate the business model, refine messaging based on real-world stakeholder input, and position the company for successful seed-stage investment.

This project unlocks high-growth potential by enabling KMI to move beyond product development into early-stage commercialization with demonstrable market validation. By strengthening visibility, refining customer value propositions, and generating pilot data, the company will be better prepared to secure seed investment, accelerate production scale-up, and expand distribution.

Project Timeline

Activity (add rows as needed)	Activity Completion Date
Hire a dedicated marketing team; finalize marketing materials, digital campaigns, and educational content targeting hospital decision-makers; align messaging with TCB distribution.	March 31, 2026
Attend key national and regional healthcare conferences throughout 2026; sponsor and participate in the 2-day IMOM event; gather feedback from hospital procurement and infection control teams; document engagement metrics.	December 1, 2026
Execute pilot demonstrations with Iowa hospitals; provide product samples; track purchase interest and document outcomes to validate the sales approach.	September 30, 2026
Analyze pilot results and conference feedback; refine sales and marketing strategy; adjust messaging, outreach approach, and reporting to demonstrate feasibility.	December 31, 2026

IEDA Project Report - Proof of Commercial Relevance Fund

Applicant Name: Hermes Biomaterials, Inc. (\$50,000)

Project Location: Ames, IA

Award Date: January 16, 2026

Company Background

Company Background: Hermes Biomaterials Inc., founded in the middle of 2023 and located in Ames, Iowa, is dedicated to advancing the field of agricultural biotechnology through innovative solutions. Their mission is to enhance biolistic delivery methods, providing researchers with the tools they need to tackle the pressing challenges in genetic engineering. By focusing on the Agtech industry, they aim to empower scientists and institutions to develop resilient, high-yielding crop varieties that can address global food security and sustainability concerns.

Products: The cornerstone of their offerings is the FGB device, a state-of-the-art biolistic delivery system priced at \$10,500. This device is engineered to facilitate the precise and efficient delivery of genetic material into target cells, making it an invaluable tool for researchers working in agricultural biotechnology. Its design incorporates advanced features that optimize the transformation process, ensuring high rates of success while minimizing damage to plant tissues. The FGB device is suitable for a variety of applications, including the development of genetically modified crops, and is built to meet the rigorous demands of modern research.

Consumables: To complement their FGB device, Hermes provides essential consumables that enhance the performance and effectiveness of their biolistic delivery system. One of these consumables is their stainless steel stopping screens. These screens play a crucial role in the biolistic process by serving as a barrier that helps guide the delivery of genetic material into plant cells. Their high-quality construction ensures durability and reliability during experiments.

They also offer specialized gold particles. These gold particles are integral to their biolistic delivery method, as they serve as carriers for DNA, allowing for effective penetration into target cells. The unique properties of these gold particles are designed to optimize transformation efficiency, making them a vital component of the genetic delivery process. Additionally, they provide a specialized delivery agent specifically designed for binding Cas proteins. This delivery agent enhances the efficiency of Cas protein delivery in genetic engineering applications, making it a valuable tool for researchers working with CRISPR technology and related gene editing techniques.

Project Description

Hermes Biomaterials aims to establish an in-house soybean tissue culture and transformation platform to accelerate the validation of their novel biolistic delivery technologies. Currently, they rely on external collaborations with companies and academic partners for biological validation, which limits their ability to iterate quickly and maintain full control over intellectual property. By bringing this capability in-house, they will significantly shorten their product development cycle, strengthen their IP portfolio, and enhance the commercial readiness of their delivery technologies.

To achieve this, they plan to use the awarded funds to hire a molecular biologist/tissue culture expert who will lead the development and optimization of the soybean transformation system. The funds will also support their existing laboratory technician at 50% effort to assist in daily experimental operations and data management.

In addition, they will acquire essential equipment, including a growth chamber, to provide a controlled environment for plant tissue culture and regeneration. Funds will also cover consumables required for molecular and tissue culture workflows—such as media, Petri dishes, purification and plasmid preparation kits, and next-generation sequencing (NGS) services for validating successful transformations and delivery outcomes.

IEDA Project Report - Proof of Commercial Relevance Fund

Applicant Name: Hermes Biomaterials, Inc. (\$50,000)

Project Location: Ames, IA

Award Date: January 16, 2026

Ultimately, this project represents a critical step toward building a robust internal R&D pipeline capable of moving innovations from concept to market-ready products more efficiently. By investing in dedicated personnel, infrastructure, and validation capacity, Hermes Biomat will be positioned to deliver cutting-edge biolistic delivery solutions faster and more reliably, with greater control over both technical outcomes and IP generation.

IEDA Project Report - Proof of Commercial Relevance Fund

Applicant Name: Broker Hero, LLC DBA Broker Hero AI (\$50,000)

Project Location: Des Moines, IA

Award Date: January 16, 2026

Company Background

Broker Hero is a SaaS business designed for business brokers who are seller agents for small- to medium-sized businesses (SMB) and lower middle market (LMM) companies. Founded in 2025 by Joe Sweeney and Steven Brockhus, the company emerged from Joe's experience a year ago when searching for a business to buy. He found few available options, with most overpriced, prompting him to build a tool for identifying off-market opportunities. Recognizing the value, Joe saw potential to sell this capability to brokers.

Many M&A tech platforms aim to disrupt by cutting out middlemen, but sellers—often baby boomers—prioritize relationships and local knowledge that tech can't replicate. Broker Hero fills this gap by enabling brokers to focus on building connections while automating prospecting.

This is year 4 of a 10-year cycle marking the largest wealth transfer in history, as baby boomers retire. Many will attempt sales to employees, family, or outsiders, but the majority may simply close without realizing their options. By empowering brokers, Broker Hero facilitates more successful transfers, creating opportunities for buyers like Joe on Main Street rather than Wall Street.

Broker Hero's beachhead product, SmartLists, leverages data providers and AI to prospect clients and identify buyers among business owners. Target customers include 3,500 U.S.-based brokers and small firms in SMB/LMM representation, with adjacent users like small PE firms, individual buyers, and financial planners.

Project Description

The project seeks \$50,000 in POCR funding to accelerate Broker Hero's commercialization through targeted marketing, event participation, branding, and product refinement. This addresses key barriers for early-stage SaaS in the brokerage niche: low visibility among fragmented users and unrefined features based on real feedback.

Activities include attending two major conferences: the Midwest Business Brokers and Intermediaries (MBBI) annual event on January 29, 2026, in Chicago, and the International Business Brokers Association (IBBA) conference in May 2026 in Minneapolis. These will serve as launchpads for demos and lead generation.

Branding and marketing collateral—such as a professional logo, roll-up banners, and promotional materials—will be developed in time for the MBBI conference to establish a strong visual identity.

Direct advertising will target broker networks via LinkedIn and industry publications to drive traffic to their site and free lead list offer.

Key personnel, including a freelance developer, will implement ongoing product tweaks based on founding charter member feedback, ensuring SmartLists meets user needs for AI-driven prospecting.

This project solves the problem of slow user acquisition in a niche market by building awareness and validating features, positioning Broker Hero for sustainable revenue from \$200/month subscriptions.

Project Timeline

Project Award Date (date of IEDA Board decision): January 16, 2026

Project Performance Completion Date:

IEDA Project Report - Proof of Commercial Relevance Fund

Applicant Name: Morrigan Company DBA MorriganAI (\$50,000)

Project Location: Des Moines, IA

Award Date: January 16, 2026

Company Background

MorriganAI is an “AI Identity” platform that helps organizations see, define, and continuously improve how AI is actually used across their workforce and systems. It targets the growing problem of “shadow AI,” where unsanctioned or opaque AI use creates productivity gaps, data-exposure risk, and compliance uncertainty. MorriganAI’s core idea: once leaders can inventory AI tools in use, map real human–AI workflows, and iteratively optimize them, they can reduce risk and unlock measurable ROI.

Products & Services

- **Crow (Identify – AI Footprint):** A lightweight app/extension plus cloud connectors that map AI tool usage with summary-level telemetry designed to avoid collecting PII or confidential data. It produces an “AI Footprint” by device/group and time window for rapid visibility, audit evidence, and opportunity spotting. Pricing is per endpoint (illustrative: ~\$1.34/device-month retail; ~\$0.87 wholesale).
- **Raven (Define – AI Identity):** Uses hierarchical small language models to analyze artifacts and generate precise, “as-built” operational maps of how work actually happens with AI—closing gaps between stated procedures and reality. Sold per analyzed artifact (not per seat).
- **Magpie (Improve – AI Optimization):** Delivers consulting-grade improvement options with predictable ROI, priced on realized savings so customers “pay for what works.”

Markets & Customers Initial focus is U.S. organizations with roughly 100–1,000 endpoints, a segment underserved by heavy cybersecurity stacks. Go-to-market runs through Managed Service Providers (MSPs) and operations consulting partners; early channel activity includes a co-marketing/reseller pilot with a CMIT franchisee. Over time, management consulting firms and financial stakeholders become key users of Raven+Magpie for faster, cheaper operational modeling and continuous improvement.

History & Traction MorriganAI began by assembling a seasoned governance and advisory bench across security, enterprise IT, and org design. Crow is in Alpha (Beta targeted for Q4 2025), Raven Alpha Q1 2025, and Magpie Alpha Q4 2025. The company has appeared in keynotes/roundtables and was selected as 1 of 10 companies in a 2025 cohort, signaling market interest in “AI Identity” as a new layer for AI governance and value creation.

Project Description

The project proposed here for funding is testing the product-market fit of the Crow product for mid-sized companies in the mid-west that are undergoing technology transformations, intergenerational transfers, or PE-backed sales. These businesses are typically harmed with unreasonably low valuations caused by opaque or uncertainty risk factors that traditional tools are unable to efficiently identify. Crow is designed to provide a fast, low-cost, minimally invasive analysis suitable for transformation planning or due-diligence analysis that will allow more owners to retain a larger share of their earned wealth, more companies to maximize their potential, and more investors to back more deals in an economically sustainable manner. This project will perfect the messaging, implementation process, and outputs of the Crow tool.

Project Timeline

Activity (add rows as needed)	Activity Completion Date
Identifying 50 target companies willing to engage in collaborative testing of the Crow product	March 1, 2026
Installing Crow on all relevant devices within the test companies	March 15, 2026
Performing on-going data gathering, collaborative analysis, and metric optimization to maximize utility for those test companies	May 31, 2026
Development of action steps, design modifications, or strategic roadmap modifications made evident through the prior analysis	June 30, 2026

IEDA Project Report - Proof of Commercial Relevance Fund

Applicant Name: Morrigan Company DBA MorriganAI (\$50,000)

Project Location: Des Moines, IA

Award Date: January 16, 2026

Project Budget

Total of Sources of Funds and Total of Use of Funds must match.

Source of Funds	Contact Name and Address (primary contact if the source is an institutional or corporate investor)	Amount	Status (proposed, committed, contingently committed)
STATE Funds	IEDA	\$50,000	Proposed
Source of Matching Funds	Morrigan Company Operating Funds	\$25,000	On Hand

Use of Funds	Amount STATE Funds	Amount Matching Funds
IP development & evaluation		
Market analysis (e.g. identifying potential test companies)	\$20,000	
Competitive analysis		
Proof of concept work		
Product refinement (e.g. making modifications based on feedback)	\$10,000	\$10,000
Market planning & market entry activities (e.g. evaluating the results of the testing)	\$10,000	\$5,000
Key personnel (e.g. covering time of testers and analysts)	\$10,000	\$10,000
Equipment		
Other		
Total Use of Funds	\$50,000 State Funds	\$25,000 Matching funds

Meets match requirements of 2 to 1 company match

Project Budget Notes: (Applicant understands project budget and that the required match amount must be raised before state funds will be dispersed.)

Funds already expended in development of this technology: \$9187.79

Prior State Awards: None

Staff Comments:

TCC Recommendations:

The TCC recommends the IEDA Board approve \$50,000 in financial assistance with repayment terms as follows: repayment amount is 1 times the award amount paid back at a rate of 3% of total gross revenue per calendar year, which does not include grant funds, with each payment due on June 1 of the following calendar year.

IEDA Project Report - Proof of Commercial Relevance Fund

Applicant Name: Renewabl Furniture, Inc. (\$50,000)

Project Location: Des Moines, IA

Award Date: January 16, 2026

Company Background

Renewabl.app is an innovative AI-powered SaaS platform and marketplace founded in 2025 by Riana LeJeune, a seasoned upholsterer and artisan with over a decade of experience in high-end custom furnishings projects.

Based in Des Moines, Iowa, Renewabl emerged from Riana's firsthand insights into industry pain points, starting as a personal tool to streamline her own workflow for premium residential and commercial commissions. In 2025, Riana developed an in-house MVP, entering beta testing with over 50 professionals.

Renewabl's mission is to empower home furnishings professionals (330,000–400,000 in the U.S.)—encompassing interior designers, decorators, upholsterers, soft furnishings/window treatment specialists, furniture refinishers/woodworkers, furniture flippers, and architects—in creating, modifying, and styling sustainable, custom pieces, fostering artisan visibility and a circular economy while reducing reliance on mass-produced imports.

Renewabl offers hyper-realistic AI visualization tool that allows professionals to upload photos or sketches from their clients and apply fabrics, paints, hardware, finishes, and soft goods in 40-60 seconds, ensuring scale-accurate patterns and realism without hallucinations. Then, Renewabl aims to offer other ERP solutions for professionals to streamline their workflows, increase average order value (AOV), and offer marketing tools to help them grow their business.

Eventually, Renewabl wants to launch a free-to-use version to the general public with the goal of creating a marketplace for consumers to visualize their own furniture, and then connect with professionals to do the work and handle the transactions of the work.

Project Description

Renewabl.app seeks POCR funding to support the commercial launch of its AI-powered SaaS platform and marketplace.

Funds will be used primarily to:

1. Hire freelance developer for rapid iterative development in conjunction with beta-user interviews, and back-end architecture review.
2. Convert beta users into paying customers (target 60%)
3. Launch branding, marketing, advertisements, and sales efforts

The product is mostly operational, with 50 beta-users across segments providing strong initial feedback on time savings and lead quality. This project leverages that momentum for refinement via user profiling, identifying high-ARPU opportunities in premium custom work. Achieving 60% beta conversion would generate \$6,000 in monthly recurring revenue, positioning Renewabl for sustainable growth in Iowa's innovation ecosystem while contributing to local artisan empowerment and economic vitality.

Project Timeline

Activity (add rows as needed)	Activity Completion Date
Hire freelance developer	February 1, 2026
Beta-user interviews & rapid iterative development with web developer	February 20, 2026
Convert Beta users to paying customers (target 60%)	March 30, 2026

ACTION**REPORT****IOWA ECONOMIC DEVELOPMENT AUTHORITY BOARD****January 2026**

From: Legal

Subject: Proposed Administrative Rulemaking - Approval to File Notice of Intended Action to Adopt Sustainable Aviation Fuel Production Tax Credit Rules, 261 Iowa Administrative Code Chapter 80

IEDA proposes to adopt a new Chapter 80. The proposed chapter describes the policies and procedures applicable to the sustainable aviation fuel tax credit program created pursuant to Iowa Code sections 15.530 through 15.535 as enacted by 2025 Iowa Acts, Senate File 657. The program provides incentives to businesses that produce high-value sustainable aviation fuel from feedstock in Iowa.

Executive Order 10 required tasks:

- Regulatory analysis published December 10, 2025.
- Public hearing held December 30, 2025. No public comments were received at the hearing. A written comment from David Fialkov, on behalf of Americans for Affordable Clean Energy, expressed concerns about the impact of the program on ethanol and biodiesel supply.
- Received preclearance from Administrative Rules Coordinator to file a Notice of Intended Action on January 6, 2026.

Proposed Motion: **Approve Filing a Notice of Intended Action to Adopt Sustainable Aviation Fuel Production Tax Credit Rules, 261 Iowa Administrative Code Chapter 80**

Submitted By: Lisa Connell

Attachments: Proposed Administrative Rulemaking

ITEM 1. Adopt the following **new** 261—Chapter 80:

CHAPTER 80

SUSTAINABLE AVIATION FUEL PRODUCTION TAX CREDIT PROGRAM

261—80.1(15) Purpose. The purpose of this chapter is to encourage development of the sustainable aviation fuel industry using the SAF program to incentivize new and existing businesses to produce high-value sustainable aviation fuel in Iowa from feedstock.

261—80.2(15) Definitions. As used in this chapter, unless the context otherwise requires:

“*Authority*” means the economic development authority created in Iowa Code section 15.105.

“*Director*” means the director of the authority.

“*Eligible business*” means the same as the definition of “eligible taxpayer” in Iowa Code section 15.531(2).

“*Feedstock*” means the same as defined in Iowa Code section 15.531(3) and includes carbon dioxide that is processed or refined in the state of Iowa and suitable for sustainable aviation fuel production without further enhancement.

“*Foreign adversary*” means a foreign government or a foreign nongovernment person as determined in 15 CFR §7.4 or 15 CFR §791.4 at any time on or after March 4, 2024, and that is listed in 15 CFR §7.4(a) or 15 CFR §791.4(a) at any time on or after March 4, 2024.

“*Foreign adversary entity*” means a foreign business subject to the jurisdiction of or organized under the laws of a foreign adversary or a foreign business owned, directed, or controlled by a foreign adversary.

“*Foreign business*” means the same as defined in Iowa Code section 9I.1.

“*Renewable chemical program*” means the renewable chemical production tax credit program administered pursuant to Iowa Code sections 15.315 through 15.322 and 261—Chapter 81.

“*SAF program*” means the sustainable aviation fuel production tax credit program administered pursuant to Iowa Code sections 15.530 through 15.535 and this chapter.

“*Sustainable aviation fuel*” means the same as defined in Iowa Code section 15.531(5).

“*Tax incentives*” means the tax credits the authority awards to an eligible business as detailed in the agreement entered into pursuant to Iowa Code section 15.532(2).

261—80.3(15) Eligibility requirements. To be eligible to receive the sustainable aviation fuel production tax credit pursuant to the SAF program, a business shall meet all of the eligibility requirements in Iowa Code section 15.532. Additionally, a foreign business shall demonstrate that it is not associated with a foreign adversary or foreign adversary entity.

261—80.4(15) Application process and review.

80.4(1) Applications for tax credits may be submitted to the authority electronically by an eligible business from February 15 to March 15 of each calendar year, beginning February 15, 2027. The authority may adjust the annual application period under extenuating circumstances.

80.4(2) The application shall include the following information, including all information required by Iowa Code section 15.532(1) “*e*”:

a. The amount of sustainable aviation fuel produced in the state of Iowa from feedstock by the eligible business during the immediately previous calendar year, measured in gallons.

b. Documentation that sustainable aviation fuel achieves at least a 50 percent life cycle greenhouse gas emissions reduction as determined by either of the following:

(1) The method described in Iowa Code section 15.531(5) “*a*”; or

(2) The method described in Iowa Code section 15.531(5) “*b*.”

Acceptable documentation includes but is not limited to fuel testing conducted by the Iowa Central Fuel Testing Laboratory in Fort Dodge, Iowa.

c. The types and sources of feedstock used to produce sustainable aviation fuel, documented in sufficient detail to allow the authority to verify that such feedstock was processed or refined in the state of Iowa.

d. The city or county where the plant producing sustainable aviation fuel is located.

e. The date on which the eligible business organized, expanded or located in the state of Iowa.

f. Any other information reasonably required by the authority in order to establish and verify that the applicant is an eligible business and the amount of the tax credit under the SAF program.

80.4(3) Applications will be reviewed and scored on a competitive basis by a review committee established by the authority. If the authority deems that additional information is needed before reviewing and scoring can be completed, and the authority makes a written request for additional information from the applicant, the applicant must provide the requested information within 30 days of the date that the written request from the authority was made. If an applicant does not provide the requested information within 30 days, the application may be denied by the authority.

80.4(4) Applications determined by the authority to be complete and eligible will be reviewed and scored using criteria established by the authority to evaluate the economic impact of an eligible business's production of sustainable aviation fuel.

80.4(5) The authority will notify an applicant when the applicant has been approved or denied by the director to receive a tax credit.

261—80.5(15) Agreement and fees. An eligible business approved to receive a tax credit shall enter into an agreement pursuant to Iowa Code section 15.532(2). The eligible business must sign the agreement within 60 days of being notified of approval for the tax credit. Upon

request by the eligible business, the authority may extend the time period for signing the agreement by an additional 30 days.

80.5(1) Upon execution of the agreement and prior to issuance of a tax credit certificate, the eligible business shall remit to the authority a one-time compliance cost fee in the amount of \$500.

80.5(2) For the duration of the agreement and for as long as an eligible business claims tax incentives pursuant to the agreement, the eligible business shall remit to the authority an ongoing compliance cost fee equal to one-half of one percent of the value of the tax incentives claimed pursuant to the agreement. This ongoing compliance fee shall be due and payable upon filing of the eligible business's tax return for each tax year in which the eligible business claims such tax incentives.

261—80.6(15) Sustainable aviation fuel production tax credit.

80.6(1) *Calculation of tax credit amount.*

a. An eligible business that has entered into an agreement pursuant to rule 261—80.5(15) may be issued a tax credit certificate in an amount calculated as described in Iowa Code section 15.533(1). The tax credit certificate shall contain the information required by Iowa Code section 15.533(6) “*b*” and any other information required by the department of revenue.

b. If a business has facilities located in more than one state, only the sustainable aviation fuel produced at facilities physically located in the state of Iowa may be counted for the purpose of calculating the tax credit.

c. If the same eligible business has an ownership or equity interest in multiple facilities at which sustainable aviation fuel is produced, the facilities under common ownership will be considered a single eligible business for purposes of calculating the maximum tax credit amount. In calculating the maximum tax credit amount, only the pro rata share of each eligible business's ownership in a facility will be attributed to that eligible business.

d. The maximum amount of tax credit that may be issued under the SAF program to an eligible business for the production of sustainable aviation fuel in a calendar year shall not exceed the amount authorized by Iowa Code section 15.533(7) “*b*”(1).

80.6(2) *Eligible production years only.* An eligible business shall not receive a tax credit for sustainable aviation fuel produced before the 2026 calendar year or after the 2035 calendar year.

80.6(3) *Maximum number of credits.* An eligible business shall not receive more tax credit certificates under the SAF program than the number specified in Iowa Code section 15.533(7) “*b*”(2). Each tax credit must be applied for separately, and each application will be reviewed independently of past tax credits. Receipt of a tax credit in one year does not guarantee receipt of a tax credit in a subsequent year.

80.6(4) *Nontransferable.* The tax credit certificates are not transferable.

80.6(5) *Termination and repayment.* Tax credits may be reduced, terminated, or rescinded pursuant to Iowa Code section 15.532(3).

261—80.7(15) Claiming the tax credit.

80.7(1) *Maximum tax credit claimed.* An eligible business that has entered into an agreement pursuant to rule 261—80.5(15) and been issued a tax credit certificate pursuant to subrule 80.6(1) may claim a tax credit as described in Iowa Code section 15.533.

80.7(2) *Claiming the credit.* To claim the tax credit, a taxpayer is to include one or more tax credit certificates with the taxpayer’s tax return and otherwise act in accordance with any applicable administrative rules adopted by the department of revenue.

80.7(3) *Refundable.* Any tax credit in excess of the tax liability is refundable. In lieu of claiming a refund, a taxpayer may elect to have the overpayment shown on the taxpayer’s final, completed return credited to the tax liability for the following tax year.

261—80.8(15) Additional information. The authority may at any time request additional information and documentation from an eligible business, including but not limited to the operations and economic impact of the eligible business, and the authority may use the information in preparing and publishing any reports to be provided to the general assembly to the extent consistent with Iowa Code sections 15.534 and 15.107B. The authority shall keep confidential any information or record in its possession with respect to the SAF program in accordance with Iowa Code section 15.532(4) “a” except that the identity of a tax credit recipient and the amount of the tax credit shall be considered public information.

261—80.9(15) Relationship to renewable chemical program. Pursuant to Iowa Code section 15.119(2) “b,” the authority may allocate up to \$10 million collectively each fiscal year for purposes of the SAF program and the renewable chemical program. The authority board shall determine the amount of such \$10 million allocated to each program in a given fiscal year. The authority shall determine whether a business may apply for and receive both a tax credit certificate pursuant to the renewable chemical program and a tax credit certificate pursuant to the SAF program in the same fiscal year. In making this determination, and among other factors, the authority may consider whether a business operates distinct facilities in the state such that a given production of chemicals does not and will not receive the benefits of both a tax credit pursuant to the renewable chemical program and a tax credit pursuant to the SAF program.

These rules are intended to implement Iowa Code sections 15.530 through 15.535.
