

**Why You Should Read This:** The document below reviews the environmental impact likely from a State Revolving Fund project. As part of the environmental review, you are entitled to provide comments. If you have concerns about the environmental impact of this project, raise them now. We encourage public input in this decision-making process.

**IOWA STATE REVOLVING FUND**  
**REAFFIRMATION OF A FINDING OF NO SIGNIFICANT IMPACT**

June 10, 2026

**To: All Interested Citizens, Government Agencies, and Public Groups**

An environmental review has been performed based on the procedures for implementing the National Environmental Policy Act (NEPA), for the proposed agency action below:

**Applicant:** City of Schaller

**County:** Sac

**State:** Iowa

**SRF Number:** FS-81-23-DWSRF-082

**Iowa DNR Project Number:** W2023-0019

Potential Other Funding Sources: CDBG

The purpose of this letter is to provide you with a State Revolving Fund (SRF) status update. This project has previously been reviewed by the DNR and a Finding of No Significant Impact (FNSI) was issued on November 20, 2023, and finalized on December 21, 2023. This project will not be receiving federal funds through SRF.

DNR received a request to add the following scope/location to the project area: The city identified an additional project area that modifies the construction limits of the proposed project. The modified area accommodates relocating the new transmission main alignment further south of the alignment previously proposed within the baseball field. The modification also adds an area immediately west of the baseball field proposed for the new Well No. 3 location. The proposed Well No. 3 will be relocated to the east side of the track from its originally proposed location on the north side of the track. These changes are proposed as part of the project scope for the previously issued FNSI for the proposed project. The proposed project includes constructing a new water treatment building to house a new membrane treatment technology to remove high levels of manganese and soften the City's drinking water, abandoning Well No. 1, installing a new well (Well No. 3), and installing a new transmission main to connect the new well to the existing system. The project also includes installing water meters for all unmetered customers. DNR has determined that the additional scope/location will result in no significant environmental impact as outlined in 40 CFR Part 6.

The FNSI is hereby Reaffirmed to include the new proposed well location and new alignment for the new transmission main. This action is taken on the basis of a careful review of the engineering report, the environmental assessment and other supporting data which are on file at the Department of Natural Resources' office in Des Moines, Iowa. These are available for public review upon request. This Department will not take any administrative action on the project for at least thirty (30) calendar days from the above date. Persons disagreeing with the above environmental decision may submit comments to the department

during this period. Your comments can be sent to [SRF-PC@dnr.iowa.gov](mailto:SRF-PC@dnr.iowa.gov) or directly to me at [Rebecca.FlynnKettman@dnr.iowa.gov](mailto:Rebecca.FlynnKettman@dnr.iowa.gov) or (515) 204-5672.

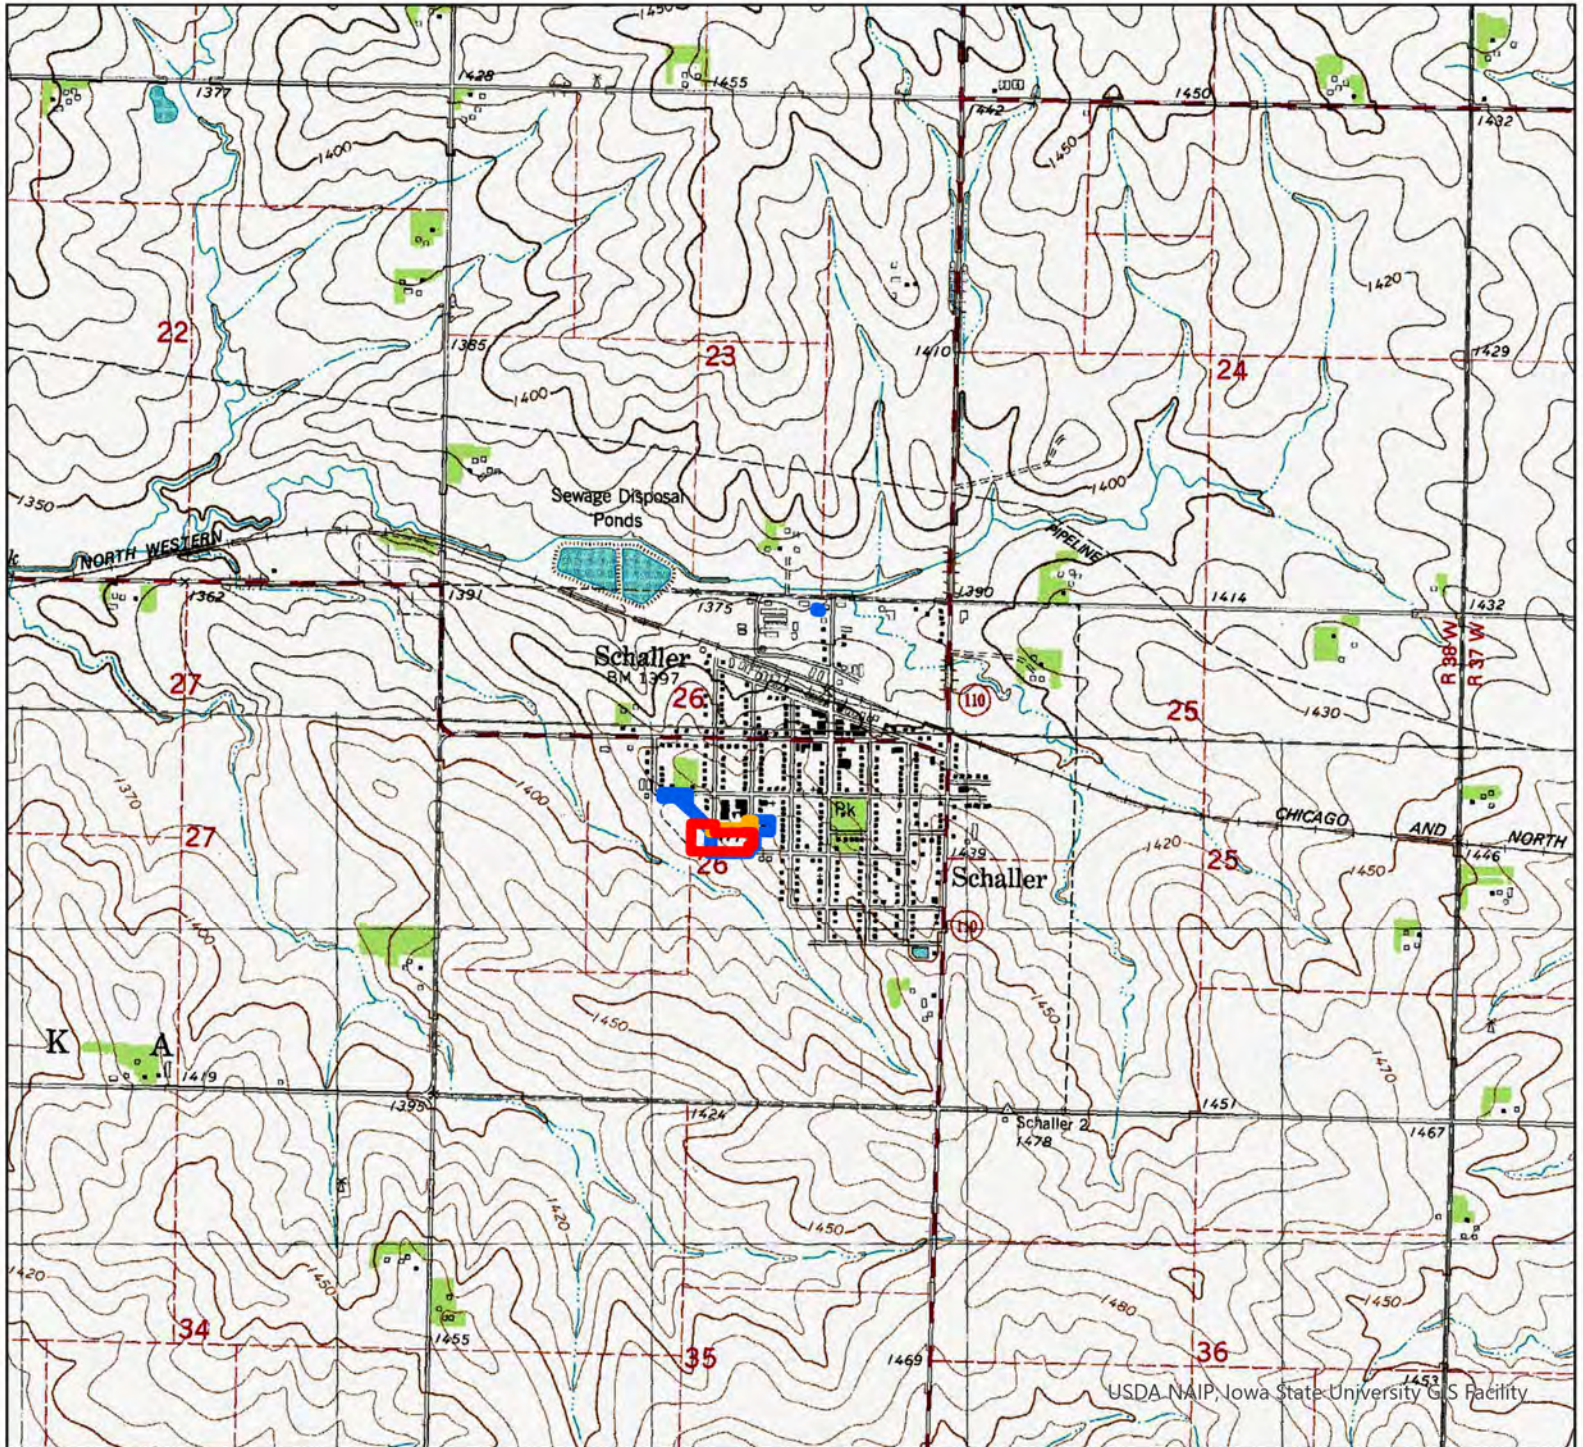

Sincerely,

Rebecca Flynn Kettman
