Why You Should Read This: The document below reviews the environmental impact likely from a State Revolving Fund project. As part of the environmental review, you are entitled to provide comments. If you have concerns about the environmental impact of this project, raise them now. We encourage public input in this decision-making process.

IOWA STATE REVOLVING FUND
REAFFIRMATION OF A FINDING OF NO SIGNIFICANT IMPACT

November 6, 2026

To: All Interested Citizens, Government Agencies, and Public Groups

An environmental review has been performed based on the procedures for implementing the National Environmental Policy Act (NEPA), for the proposed agency action below:

Applicant: City of Logan
County: Harrison
State: Iowa

SRF Number: FS-43-25-DWSRF-039
Iowa DNR Project Number: W2025-0109

Potential Other Funding Sources: CDBG

The purpose of this letter is to provide you with a State Revolving Fund (SRF) status update. This project has previously been reviewed by the DNR and a Finding of No Significant Impact (FNSI) was issued on August 27, 2025, and subsequently finalized on September 29, 2025. This project will not be receiving federal funds through SRF.

DNR received a request to add the following scope/location to the project area: The city identified additional areas beyond the original environmental review's project area for the water treatment facility improvements. The proposed project will construct a new iron removal water treatment plant including a new building with treatment equipment, pumps, a detention tank, and buried raw and finished water mains that connect the proposed and existing treatment plant sites. The project also includes site work, a new generator, mechanical and control equipment, and all connections and appurtenances. The plant was originally planned along N. 6th Avenue just south of Highway 30; however, the city identified an alternative location along N. 6th Avenue north of Highway 30. This site adjustment expands the overall project boundary and extends the planned raw and finished water pipelines north to the new location. DNR has determined that the additional scope/location will result in no significant environmental impact as outlined in 40 CFR Part 6.

The FNSI is hereby Reaffirmed to include the new proposed water treatment plant location and extended alignment for the buried water mains. This action is taken on the basis of a careful review of the engineering report, the environmental assessment and other supporting data which are on file at the Department of Natural Resources' office in Des Moines, Iowa. These are available for public review upon request. This Department will not take any administrative action on the project for at least thirty (30) calendar days from the above date. Persons disagreeing with the above environmental decision may submit comments to the department during this period. Your comments can be sent to SRF-PC@dnr.iowa.gov or directly to me at Rebecca.FlynnKettman@dnr.iowa.gov or (515) 204-5672.

Sincerely,

Rebecca Flynn Kettman
